

How to Enter a Test On-line

Entering your test results on the web will save you time and money. You will be able to print a clean, professional completed test report for your customer. There will be a short and almost painless learning curve.

- ❖ Enter your 'user name' and 'password' to login to the web test entry site. User names and passwords are issued by the utility.

- ❖ If you are working for more than one company the **Main** screen will reflect this and include all company names allowing you to select the appropriate company.
 - Your name along with the company's name will appear at the top of the page.
 - For testers working for more than one company, your name and the company's name you selected will appear at the top of the page followed by [click to change](#)
 - ↳ This link allows you to change which company you are logged in under without having logout and then back in.

- ❖ To enter test results, first you need to find the correct backflow assembly via the *Device Profile Search* screen, by clicking the **Add Test** button located in the top toolbar.

- ❖ To find the backflow assembly enter the **Serial #** and the **House/Building #** **-OR-** the *** Cross-Connection /Hazard #** (*the utility will provide this number to the water customer)

- ❖ Whether you search by **Serial #** and the **House/Building #** **-OR-** the **Cross-Connection/Hazard #**, once you click the **Locate Device** button, the *Verify Site Profile* screen appears;

- ❖ Notice the Last Test Date and Time are displayed at the top-middle of the *Verify Site Profile* screen
 - *The date of the test is displayed to allow you to see if you are accidently entering the test a second time.*

- ❖ The *Verify Site Profile* screen enables you to verify or make changes to the site and/or device data. If no changes are necessary, click the **Confirm and Enter Results** button at the bottom of the screen to proceed to the next screen.

*** The updated information is both valuable and appreciated by the utility ***

- ❖ Once any necessary changes have been made click the **Confirm and Enter Results** button to proceed to the *Test Data Entry* screen.

- ❖ Based off the **Serial #** and the **House/Building #** -OR- the **Cross-Connection/Hazard #** you searched for, the appropriate **'Device Type'** *Test Data Entry* screen will appear.
 - In the top row of the *Test Data Entry* screen the **'Device Type'** code will appear; **PB, DC** or **PVB/SVB**. See examples of each screen below and on pages 5 & 6.

- ❖ When you click the **Print Test Report** button, the print preview screen will appear. To be able to print the document, you must first export the document into a PDF or another application.

- ❖ In the far top left-hand corner of the screen, there are 2 options to allow you to export the report so you can print
 - The printer icon on the left exports the document into a PDF allowing you to then print
 - The arrow icon on the right allows you to select which program to export the document into using the drop-down menu, which will then allow you to print.

- ❖ No matter which option you choose, once ready, click the **Export** button at the bottom right of the window.
 - The test report will export to a PDF or the selected program and appear in the bottom toolbar of the screen (or in your Downloads folder) allowing you to open, save and print the exported document.
- ❖ When you have completed your activity in the website, navigate to the top too bar and click **Logout** which will direct you back to the main login screen.
